Working Experience

Definity First - Senior Front-End Developer
I am part of the SharePoint team, here we develop intranets for big companies and schools. I develop the front-end part of customized SharePoint webparts using react.js. Some of our clients are: Harvard, Becton Dickinson, Springfield Clinic, College of Charleston, Bridgestone, Wesco, among others.

2019 – Present

LIPS - Design Lead
This startup is developing an all-in-one tool for sales prospecting, advertising, and market research. I lead the design team and develop the front-end part of the system.

2018 – 2019

GoIndigo - Design Lead
I'm a co-founder of this startup that has developed and launched two web applications projects focused on usability. I designed and developed the UI for both projects.

2016 – 2019

Icalia Labs - Frontend Developer
I entered their designer internship where I learned about the Design Sprint process. I participated in UI maintenance.

2016

Technical Skills

Fundamental web development
I'm proficient with Sass language, my development process always includes automatic unit testing using True framework and automatic documentation following Sassdoc standards. I'm also avid with HTML, vanilla JavaScript, and asynchronous rendering.

CSS Advanced
HTML Advanced
JavaScript *Advanced*

Web applications and back-end
I'm capable of setting up and maintaining a serverless web application using Google Cloud, Firebase, and Node server with Express.

Typescript Advanced
SCSS Advanced
React.js Advanced
Node.js Intermediate
Firestore Intermediate

Atomic design systems
As a designer, my default thinking process will include a design system, user testing with prototypes and user accessibility. I have keen attention to details while expanding or modifying an existing system. I'm familiar with the Design Sprint process.

Sketch Intermediate
InVision Intermediate
Accessibility Beginner
User Testing Beginner

Non–Technical Skills

Scrum framework.
Software quality processes.
Writing and content creation.
Public speaking and presentations.
Practical use of color theory.

Languages
Native spanish
Fluent English.
